CURE FOR CONSUMPTION.

A New York Physician Claims
to Have Discovered It.

New York, February 6.—Dr.

Cyrus Edson, who was at one

time health commissioner of the

city of New York and county,

and who has been for years a

well known contributor to lead-
ing magazines, will publish to-
morrow in the Medical Record

an article under the following

title.

"A Rational Treatment for

Phthisis Pulmonalis, together

with some notes on a new re-
medial solution."

Under this heading comes

the description of a discovery

made by Dr. Edson, which, it

is held, may solve the hitherto

unsolved problem of the cure

of the tuberculosis, or consump-
tion.

In order to understand Dr.

Edson's discovery it is neces-
sary to remember that Pasture

and Koch established the fact

that germ diseases had as their

cause the presence in the body

of minute organisms, called

germ, microbe and the like.

It was not long before those

germs were cultivated, as it was

called. That is, some germs

from a diseased person were

transferred to some substance

on which they would grow.

Scientific men made experi-
ments on these cultivated germs

They found that if a mixture

of one part phenol or carbolic

acid to three thousand parts of

water were floated over a colony

of germs and left there for

twenty-four hours all these

germs died. It naturally oc-
curred to them that if carbolic

acid would kill these germs

outside the body it would kill

them inside, and the conclusion

was that if they could kill all

the germs in the body they

could destroy the cause of the

disease and thus cure the lat-
ter.

The experiment was prompt-
ly tried, but many were poison-
ed by the acid and the idea

had to be given up.

Dr. Edson's attention was

directed to this subject last

year and he began the study of

carbolic acid. After a long

and tedious experiment he

produced a fluid which he call-
ed aseptolin. It contains 2.75

per cent of carbolic acid and to

every ounce of it is added one

hundredth of a grain of a salt

called pilar-phenyl-hydroxide.

The aseptolin is injected under

the skin and thus directed into

the blood. The dose is one

hundred minims or drops in-
jected with a hypodermic

syringe once in twenty-four

hours.

The circulation of the blood

applies this carbolic solution

to every part of the body many

times an hour. Wherever there

is disease and the germs which

cause it, that spot is being con-
tinually washed with this car-
bolic solution, in which no germ

can live more than a few hours.

To date 217 persons have been

treated with aseptolin for con-

ABSOLUTELY PURE

RIGHTS OF BELLIGERENTS.

Weyler Will Issue a Proclama-
tion Conferring Them.

New York, Feb. 6.—The Her-
ald's Washington special says:

Just as soon as General Wey-
ler, successor of General Cam-
pos in command of the Span-
ish forces in Cuba, assumes his

new duties he will issue a pro-
clamation practically giving

belligerent rights to the insur-
gents. I learned at the depart-
ment today that Secretary Ol-
ney has been advised of the

proposed proclamation and of
the programme Spain has so
far outlined for carrying on the
war. The proclamation will de-
clare the intention of Spain to

carry on a humane war as long
as the Cubans confine their
warfare to civilized methods.
Of course any action on the
part of the Cubans of a barbar-
ous character will be grounds
for retaliation by the Spanish
forces. General Weyler will
issue the proclamation, it is ex-
pected, within a week. He is
expected to conduct a vigorous
campaign, which is to open just
as soon as he assumes com-
mand of the Spanish troops on
the island. It is the expecta-
tion of the Spanish government
that the rebels will agree to the
terms or the proclamation to be
issued and cease the destruc-
tion of property of non-combat-
ants.

The action of Spain is looked
upon as a shrewd diplomatic
move by the Madrid authori-
ties. The communication re-
ceived at the state depart-
ment was very friendly in tone
and relieves the United States from
taking any steps in the direc-
tion of suggesting action by
her looking to belligerency,
such as was suggested by the
resolution favorably reported
by a majority of the senate for-
eign relations committee.

IN OLDEN TIMES

People overlooked the importance of
permanently beneficial effects and
were satisfied with transient action;
but now that it is generally known
that Syrup of Figs will permanently
overcome habitual constipation, well-
informed people will not but other
laxatives, which act for a time, but
finally injure the system.
